CS Undergrad @ UC Berkeley — Software Engineering — React Native, Swift, Firebase

EDUCATION

University of California, Berkeley

B.A. Computer Science, French Minor, GPA: 3.8/4.0

Aug. 2022 – May 2026

- **Relevant Coursework:** Data Structures (A-), Operating Systems, Computer Architecture (A), Efficient Algorithms, Discrete Math, Probability.

EXPERIENCE

Athena AI Ventures

Jan. 2025 – Present

AI & Mobile Engineer Intern (Software Engineer Intern)

San Jose, CA

- Implemented a user feedback system to refine UX/AI chatbot interactions, leveraging TypeScript, and Firebase.
- Built and shipped a chat enhancement feature using React Native and Firebase, including a personalized welcome message that improved user onboarding and engagement.
- Prototyping speech-to-text input and text-to-speech output features for Athena AI via React Native integrations.
- Contributed to AI-powered chat enhancements by participating in discussions on UX and feature development.

Salamati

Aug. 2024 – Dec 2024

React Native Developer

Berkeley, CA

- Implemented OTP-based login with Supabase Authentication, enabling a faster, secure, email-based account access
- Built a password reset UI/Backend logic with Supabase Auth, improving account retention for returning users.
- Developed account deletion functionality with new UI confirmation modals and Supabase cleanup logic to meet user privacy standards and ethical data practices.
- Collaborated with project leads to create a space for growth, connection, and support for 150,000+ Afghan women.

JMG WorkScape

Jul. 2024 – Sep. 2024

Project Manager/Designer, iOS Development (Project)

San Diego, CA

- Spearheaded the design and development of a SwiftUI-based iOS app to help landscaping contractors organize invoices, job routes, and navigation.
- Implemented a custom Trie-based search system for rapid address lookup, improving workflow efficiency.
- Led end-to-end product cycle from design (Figma) to code, collaborating cross-functionally with a UCSD peer.

MDB Socials

May 2024

React Native Developer (Project)

Berkeley, CA

- Developed a cross-platform event management app using React Native, Firestore, and Expo, enabling users to save and organize social events with real-time updates.
- Built intuitive UI components to improve discoverability and user engagement; ensured data persistence across devices via Firestore integration.

College of Computing, Data Science, and Society – Dean's Office

Aug. 2024 – Present

Faculty/Staff Office Assistant

Berkeley, CA

- Coordinated logistics for college-wide events (500+ attendees) and supported exec admin for CDSS leadership.
- Created a comprehensive 150+ entry Event Space Guide to improve accessibility and planning for CDSS-affiliated organizations.

LEADERSHIP

Mobile Developers of Berkeley

Jan. 2025 – Present

VP of Marketing, React Native Developer

Berkeley, CA

- Led brand design for MDB's Spring 2025 recruitment campaign, promoting club values and experiences across social media.
- Reviewed 250+ applications and conducted behavioral/technical interviews as part of MDB's interview committee, helping grow a diverse and high-performing developer community.
- Captured and uploaded 100+ photo/video memories in a club-exclusive collection, improving overall club experience

SKILLS

Programming Languages: TypeScript, JavaScript, Swift, Python, Java, C

Tools: Git, Xcode/Simulator, Android Studio, VSCode, Figma, Adobe Express, Canva, Docker

Frontend: React Native, Next.js, SwiftUI, Expo

Backend: Node.js, Firebase, Supabase, PostgreSQL

AI/ML: OpenAI API, Assistants API

World Languages: Spanish (Native), French (Fluent)
