

MICHAEL GUERRERO

San Diego, CA | +1 (619)-597 9661 | michael.guerrero0704@gmail.com | [GitHub](#) | [LinkedIn](#)

EDUCATION

University of California, Berkeley

May 2026

B.A. Computer Science, French Minor

GPA: 3.7/4.0

- **Relevant Coursework:** Intro to Software Engineering, Data Structures, Computer Security, Artificial Intelligence, Efficient Algorithms, Operating Systems, Computer Networks, Discrete Math & Probability, Machine Structures, Information Devices and Systems.

EXPERIENCE

Circuit

Jun. 2025 – May 2026

Full Stack Engineer, Project Manager

Berkeley, CA

- Built **5 admin dashboards** (events, users, coupons, analytics, business) integrating **Remo API**, **Firebase Secrets**, and **Google Analytics** event tracking, reducing manual ops overhead by **90%** across business and operations workflows
- Deployed **Circuit MVP** to production on **Vercel** with **CI/CD pipelines**, **Firebase Secrets** management, and real-time uptime monitoring, ensuring stable performance and secure deployments for **50+ early adopters**
- Led **3 full-stack engineers and 1 designer** through Agile sprints, managing **60+ PR reviews** on GitHub, aligning with CEO on product roadmap, and driving a **60% increase in team velocity** through structured retrospectives
- Authored technical requirements and sprint backlogs in **Notion**, delivering **code review feedback** and architecture mentorship to junior developers to maintain consistent quality and on-time feature delivery

Athena AI Ventures

Jan. 2025 – May 2025

Software Engineer Intern

San Jose, CA

- Developed a **user feedback system** surfacing user feedback to product, engineering, and leadership teams, improving GAI responses / user experience for **25k active users**, leveraging React Native and Firebase backend.
- Delivered **Speech-to-Text/Text-to-Speech I/O** features for chats, improving **1M+ Athena AI responses** via React Native integrations and ensuring smooth integration for Google Cloud STT/TTS for a seamless user/chatbot interaction.
- Crafted a **personalized intro message**, improving user onboarding and engagement for **100k registered users**.

Salamati

Aug. 2024 – Dec. 2024

Full Stack Engineer

Berkeley, CA

- Engineered a **One Time Password login flow** and **password reset** feature, improving app speed and security by **95%** for **150k+** Afghan women, leveraging TypeScript / React Native frontend with email based Supabase Authentication backend.
- Developed **account deletion functionality** satisfying user privacy **compliance** and ethical data practices, through new confirmation modals and user flows, paired with Supabase **Edge Functions** for automated backend cleanup logic

DataAnnotation

May 2026 – Present

AI Evaluation Engineer

Remote

- Rated **AI coding agent** sessions (Claude Code) on real-world software engineering tasks across **TypeScript**, **Python**, and **Flutter** codebases, authoring technical rating rationale distinguishing model behavioral failures from infrastructure issues
- Authored **agentic coding training tasks** and evaluation rubrics for **Gen AI** models, benchmarking model performance

Mobile Developers of Berkeley

Jun. 2025 – Feb. 2026

President & Technical Lead

Berkeley, CA

- Led growth and collaboration among **50+ members** through club operations management and strategic initiatives.
- Led **brand design** for MDB's Spring/Fall 2025 recruitment campaign, increasing social media presence by **25%**
- Reviewed **400+** applications and conducted behavioral/technical interviews, contributing to club growth.

PROJECTS

NOSO Labs — Service Call Analysis Dashboard

Nov. 2025

Full Stack Developer | Next.js 15 | TypeScript | Firebase | OpenAI

Remote

- Built a **call analysis dashboard** in **Next.js 15** integrating **AssemblyAI** for transcription, **OpenAI API** for compliance analysis and sales insights, and **Firebase** for storage, a synchronized audio player and speaker color-coded transcript view

JMG WorkScape

Jul. 2024 – Sep. 2024

iOS Developer

San Diego, CA

- Developed a contractor invoicing, client management, and job navigation iOS app built in **SwiftUI**, featuring a custom **Trie-based client lookup** algorithm, improving address search by **90%**, reducing scheduling overhead for field contractors

SKILLS AND INTERESTS

Programming Languages: TypeScript, JavaScript, Swift, Python, Java, C, Ruby, SQL, HTML, CSS, RISC-V

Tools and Tech: Git, Xcode/Simulator, Android Studio, VSCode, Cursor, Figma, Adobe Express, Canva, Notion, Docker, ReactJS/React Native, Next.js, SwiftUI, Expo, Node.js, Rails, Firebase, Supabase, PostgreSQL, OpenAI API, Assistants API

World Languages: Spanish (Native), French (Fluent) **Interests:** Photography, Nature, Films/TV Shows, Music, Vintage
